Web: www.uraseal.com

Certificate No. C2018-01847

Uraseal's CSM Series System is used for the encapsulated repair or splicing of twisted pair or coax cable. The kit comes complete with a translucent vinyl closure and encapsulant. *Not UL Approved*

- **Exclusive Design**
- **100% Water Tight**
- **Cost Effective**
- **Fungus Resistant**
- **Easy Installation**

Adaptable & Easy to use

The self-sealing tapered ends on the flexible case provide a positive seal to various size cables without taping. The pouring slots and air vents allow air to escape, while the closure will allow you to work out any entrapped air bubbles.

Excellent Penetration

Low viscosity compound completely penetrates even large conductor bundles.

Safe

The encapsulating resin has controlled exotherm that will not damage even the thinnest wall of polyethylene or polypropylene insulation.

Assured Protection

The CSM Series kit provides positive moisture protection even in the toughest environments with excellent electrical and insulation properties.

Cold Temperature Casting

Excellent encapsulation can be achieved even when the cable is at 0°F (-18°C) if the polyurethane is preheated to 50°F (10°C).

Faster Gel Time

Approximately 10 minutes at 77°F (25°C).

Please contact Uruseal, Inc. Quality Dept. for assistance and recommendations on specifications for this product.
