Certificate No. 74 300 3830

The Shake N’ Seal® FOD-40™ splice kit is specifically designed for fiber applications and accommodates fusion and various mechanical splices. The FOD-40™ closure protects splices from moisture and helps to eliminate cable deterioration and other related problems that can lead to signal loss and cable failure. Uraseal’s “Shake N’ Seal®” technology is ideally suited for direct burial applications or equivalent by providing a **permanent water-tight seal**. The kit creates a permanent seal around the splice and cable. The kit can be used for adding a length of cable to a run or building a branch splice.

Properly assembled FOD-40 kit ready for encapsulation with splices held securely on the pressure sensitive pad.

- Compact Design
- 100% Water-Tight Seal
- Permanent Splice Protection
- Encapsulates Multiple Splices
- Use in Direct Burial Applications or in hand holes
- Excellent Pull Out Strength
- Easy to Install

The FOD-40™ quickly and permanently encapsulate multiple fibers and will accept flat and round cables up to 1/2” in diameter. They are the perfect **protection in wet or damp areas** and provide excellent pull-out strength in freeze/thaw situations as well as in high-heat environments where expansion and contraction is an issue. The kits are safe and easy to use.

Kit comes complete with base, clear cover, tube of encapsulant, manipulation stick, 4 cable ties, 2 foam blocks, foam wrap, and emery paper.

Please contact Uraseal, Inc. Quality Dept. for assistance and recommendations on specifications for this product.
